SUMMARY

Full stack web developer with a passion for cleanly written and well-tested code. With experience in Ruby on Rails and JavaScript, and a background in finance, I discovered programming while completing a Master's in Information Systems. I am thoughtful in my approach to web development and bring strong skills in data analysis that help companies turn data into actionable information.

TECHNICAL PROJECTS

React Timer – *Workout interval timer.* (Live Demo: react-timer.snsavage.com)
• Developed single page application with React, React Router, Redux.
• Handled data persistence with custom Ruby on Rails API including JWT for authentication.
• Designed user-interface with Semantic UI.

Carb Tracker – *Daily nutrition tracking to reach health goals.* (Live Demo: carbtracker.herokuapp.com)
• Developed with Ruby on Rails, JavaScript and jQuery.
• Utilized NutritionIx API for natural language food searches.
• Tested codebase using RSpec, Capybara, and VCR.

Photo Vistas – *Unsplash.com photos as your browser homepage.* (Live Demo: photovistas.com)
• Developed with Sinatra using the MVC pattern including ActiveRecord ORM.
• Used unsplash_rb gem to interface with the Unsplash API.
• Designed front-end with the Neat grid, Refills components, and custom SASS.

TECHNICAL SKILLS

HTML, CSS, SQL, Ruby, Sinatra, Ruby on Rails, JavaScript, jQuery, React, Redux, TDD, Git, Vim
